

**Fico Asia Sdn Bhd**, a backend equipment manufacturer for the semiconductor industry and an engineering-to-order company has acquired reputable recognition due to its high precision toolshop and state-of-the-art IT infrastructure which specializes in tool design, fabrication, assembly and testing.

ISO 9001:2000 and ISO 140001 certified, **Fico Asia** was restructured recently to be a part of **BESI Group** (based in The Netherlands) as a specialized Backend Equipment Tooling Manufacturing Center and acts as an internal supplier of tooling & equipment assembly for the Group.

This premise also house the Far East Region in Sales & Service activities which is supported by personnel located in Penang, Malacca, Singapore, Thailand, Hong Kong, Taiwan and Philippines, Fico Asia is geared towards success in product excellence, competitive pricing and superior after-sales service in the Asian region with commitment to performance excellence and uncompromising customer focus.

On top of that, our plant builds and produces Mold Machines, Compact Line Trim & Form, Die Sorting Machines, Die Bonder and Singulation Machines. The system integration involves components such as Sheet Metal, Costing Parts, Electrical Assemblies and Standard Parts. The facility is anticipated to experience a two-fold increase annually for the next 3 years due to our Corporate Relocation strategy.
